

Who We Are

The IT Sector Coordinating Council (IT SCC) SMB Working Group provides small and medium-sized businesses **access** to an extensive network of sector and key government partners and **connections** to enterprises across sectors and of all sizes. The working group gives a seat at the table for SMB leaders to bring **expertise** to influence public policy and contribute to building a secure infrastructure through established public-private partnerships. The IT SCC SMB working group focuses on unique challenges and opportunities facing small and medium-sized businesses within the IT sector, including but not limited to: the adoption of cybersecurity best practices in industry and government, COVID-19 and its impact on the IT SMB community, supply chain risk assessment, management and governance, and emerging technologies and implications for IT SMBs.

Value in Becoming a Member
